PART B: ADDITIONAL INFORMATION REQUIRED BY THE BURSA MALAYSIA LISTING REQUIREMENTS

B1. Performance of 15-month ended 30 September 2023

The financial year end of the Company and the Group has changed from 30 June to 31 December as announced to Bursa Malaysia Securities Berhad on 30 May 2023. As such, there are no comparative figures available for the corresponding periods in the preceding year.

For the 15-month period ended 30 September 2023, the Group posted a revenue recognition of RM1,649 million from its fabrication division worldwide and a gross profit of RM272.30 million, representing an average gross profit margin of 16.5% in the current financial period.

Consequently, the Group reported an Earnings Before Interest, Tax, Depreciation and Amortisation ("EBITDA") of RM65.62 million including unrealised loss in foreign exchange incurred for the current financial period under review.

The Group reported a Loss Before Tax ("LBT") of RM198.79 million in the current financial period, mainly due to finance costs incurred for certain capital assets under construction which had been expensed off into income statement in the current financial period.

Asia & Oceania Segment

This Segment posted a revenue recognition of RM83.53 million to the Group solely from its fabrication business during the current financial period.

Consequently, this Segment's gross loss stood at RM17.91 million with a LBITDA of RM4.53 million mainly due to the fixed factory maintenance cost incurred for the ethanol plants in Thailand and high unabsorbed fixed overheads incurred by its fabrication division in Malaysia as a result of low order books.

Europe Segment

The Europe Segment posted a revenue recognition of RM1,565 million mainly contributed from one of its key fabrication plants in Germany, namely BORSIG. BORSIG had contributed 79% to the consolidated revenue of the Group for the financial period under review.

This Segment had contributed a gross profit of RM290.21 million to the Group and achieved an EBITDA of RM61.82 million inclusive of unrealised foreign exchange loss incurred for the financial period under review.

America Segment

This Segment had ceased operations in the previous financial period and posted insignificant operating loss to the Group mainly arising from unrealised foreign exchange loss.

B2. Performance of the current quarter against the preceding quarter (5th quarter 2023 versus 4th quarter 2023)

The Group posted a lower revenue of RM369.22 million in current quarter as against RM378.51 million in the preceding quarter, mainly due to higher revenue recognition achieved by its fabrication business in Germany.

Consequently, the Group recorded a lower gross profit of RM63.13 million in the current quarter as against RM53.96 million in the preceding quarter. The Group posted an LBITDA of RM19.70 million and LBT of RM50.48 million respectively in the current quarter as against EBITDA RM73.88 million

and LBT RM12.87 million in the preceding quarter in the absence of unrealised foreign exchange loss incurred in the preceding quarter.

B3. Prospects

The Board anticipates that the outlook for the financial year will continue to remain challenging, given the global economic condition and the various corporate actions still being executed to restructure the Group. Taking the impact of all these factors the uncertainties in the short term are at an elevated level.

The Malaysian economy expanded by 3.3% in the third quarter of 2023 (2Q 2023: 2.9%). Growth was anchored by resilient domestic demand. Household spending remained supported by continued growth in employment and wages. Despite the challenging global environment, the Malaysian economy is projected to expand by around 4% in 2023 and 4% – 5% in 2024. Growth will continue to be driven by the expansion in domestic demand amid steady employment and income prospects, particularly in domestic-oriented sectors. This growth performance along with other favourable economic developments would provide support to the ringgit. (Sources: Bank Negara Malaysia)

The European Commission announced in November 2023 that the first auction under the European Hydrogen Bank has started, designed to support the production of renewable hydrogen in the bloc. With the Commission having a goal of producing 10m tonnes/year of renewable hydrogen by 2030, the European Hydrogen Bank has been seen as a key enabler of support, and a second auction with additional funding is due in spring 2024. Germany is forecast to import at least half of its hydrogen requirements by the end of the decade, and is searching for partners close to home to allow for pipeline flows to occur as well as ammonia imports from other global regions. (Sources: European Hydrogen Market Summary – icis.com)

In view of the strong demand for renewable energy sector, the Group foresees that its subsidiaries in Germany with its long-standing heritage in its product markets will be benefited from the renewable energy investment particularly in green hydrogen. Its Process Heat Exchangers, Membrane, Compressor, and Valve Technology segments which are in the forefront of green hydrogen technology are expected to be driven strongly by the acceleration of environmental regulations, resource scarcity, need for alternative fuels which proven by its strong order books.

Barring any unforeseen circumstances, the Group aims for positive performance in its European operations and market.
